

Centrifugal Compressor Overhauls

Reduce Downtime and Improve Performance

Option 1: Factory Airend Overhaul

- Remove the complete airend at the **customer site**
- Ship unit to our plant for disassembly, inspection, evaluation, and post-inspection quoting
- Repairs will be completed, all critical areas cleaned, and the unit will be painted

Option 2: On-site Airend Overhaul

- On-site disassembly
- Ship primary components to **our plant** for disassembly, inspection, evaluation, and post-inspection quoting

Option 3: Airend Exchange

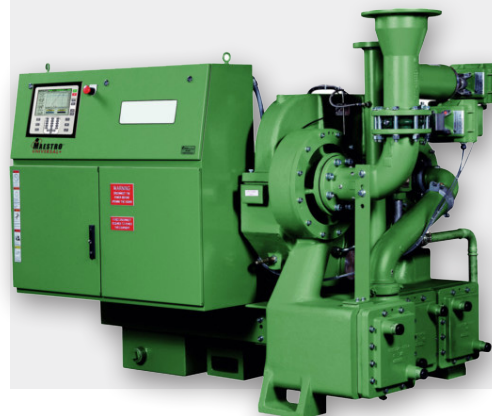

- Ship completely assembled replacement airend
- Install on-site – one service call
- Reduced downtime

Airend Services

Over time, the airend of a centrifugal compressor may begin to wear, which can lead to reduced efficiency and increased energy consumption. At Air Relief, we offer exchange and rebuild options to get you back up and running.

Brands We Rebuild
